## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on 10 May 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1-37 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueda et al. (US 5,175,618) as set forth in the previous Office Action Paper No. 31.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1-37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Iu (US 5,293,229) in view of Ueda et al. (US 5,175,618) as set forth in the previous Office Action Paper No. 31.

*Response to Arguments*

5. Applicant's arguments filed 05/10/04 have been fully considered but they are not persuasive.

The applicant argued that Ueda does not disclose unidirectional prediction from a frame that is defined as a bi-directionally predicted frame according to the encoding protocol, and a storage medium having instructions to implement motion estimation, pages 10-13 and 15 of the remarks.

The examiner respectfully disagrees with the applicant. It is submitted that Ueda discloses unidirectional prediction (77 of fig. 12, note a inter-field/inter-frame motion compensation circuit performs uni or one-direction motion compensation prediction, see also col. 14, lines 13-16) from a frame (**another frame** fig. 10) that is defined as a bi-directionally predicted frame according to the encoding protocol (fig.10, note odd numbered field of reference frame (I or P frame) inter-frame predicts in one-direction prediction an odd-numbered field of another frame (B or P); and an even numbered field of the reference (I or P frame) inter-frame predicts in one-direction a even-numbered field of another frame (B and P frame)); wherein coding for a media storage system inherently have instructions to implement motion estimation (col. 2, lines 12-15). In view of the discussion above, the claimed features are anticipated by Ueda and unpatentable over the combination of Iu and Ueda.

It is noted that the arguments on page 13-15, Igarashi reference, are moot, the rejection is withdrawn.

***Conclusion***

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
